Working Smoke Detectors Save Lives

HeartSaver AED Classes

Nearly 80 percent of cardiac arrests occur outside the hospital. Providing training that enables employees to take appropriate rescuer action at the workplace is an essential element of an effective safety program. The HeartSaverAED Course give you the skills to learn and complete this task. Upon successful completion, students receive a course completion card valid for two years

Registration:

- Make all checks payable to Williamson County ESD#3
- Must register at least one week prior
- Book is available upon payment

**This training is made possible thanks to the members of
Hutto Fire Rescue.**
